GE HealthCare introduces a new capability for seamless reading and reporting workflows

November 24, 2026

- InteleOrchestrator Clarity builds on InteleOrchestrator workflow orchestration and provides clinical summarization and report draft generation in one workflow, making reading workflows seamless so radiologists can focus on clinical diagnosis

CHICAGO--(BUSINESS WIRE)--Nov. 24, 2026-- GE HealthCare (Nasdaq: GEHC) announced InteleOrchestrator Clarity, the AI layer for InteleOrchestrator, its enterprise workflow solution. InteleOrchestrator Clarity, developed by Intelerad, a GE HealthCare company, is an AI-enabled layer within InteleOrchestrator that supports summarization and reporting to help radiologists spend less time managing workflow and documentation and more time focused on interpretation. Deployed through InteleOrchestrator Cloud, InteleOrchestrator Clarity enables practices to adopt AI at their own pace, building on the InteleOrchestrator workflow they already run.

According to the American Medical Association's 2025 National Physician Comparison Report, 45.2% of radiologists reported at least one symptom of burnout. The findings underscore the importance of workflow support that can help clinicians manage day-to-day demands.[1]

"Radiologists need to stay focused on the case while managing an increasingly demanding reading day. InteleOrchestrator adapts the reading queue to the needs of the practice; InteleOrchestrator Clarity brings related prior information into view and the radiologist, and helps prepare reports, all within the same workflow. Less time assembling information means more time for interpretation and patient care," said Scott Miller, CEO of GE HealthCare's Solutions for Enterprise Imaging.

With InteleOrchestrator Clarity, radiologists can access source-linked summaries of available prior reports and patient history within the reading workflow, helping them establish clinical context without searching across separate documents. Links to the underlying information allow radiologists to review sources and verify the summarized content. As the radiologist dictates findings, InteleOrchestrator Clarity consolidates the dictation and available information into a structured report draft for review and finalization. Together, these capabilities help reduce the logistical and documentation work surrounding the read while keeping the radiologist in control of interpretation, verification, and the final report. The radiologist reviews the draft, makes any necessary corrections and finalizes and signs the report.

"InteleOrchestrator Clarity helps simplify the work surrounding the read, allowing me to focus more fully on the radiology, the diagnosis and clinical judgment, rather than navigating systems and assembling information. The entire reading experience feels more focused and intuitive. It has even made reading cases more enjoyable."

Dr. Neerav Mehta, Diagnostic Radiology and Neuroradiology with Radiology Associates of Venice and Englewood.[2]

InteleOrchestrator Clarity is available now to InteleOrchestrator customers through InteleOrchestrator Cloud. See a demonstration at RSNA 2026 in GE HealthCare's booth #7330 and Intelerad, a GE HealthCare company, booth #6113 during the Radiological Society of North America (RSNA) 2026 Annual Meeting.

About GE HealthCare Technologies Inc.

GE HealthCare is a leading global healthcare solutions provider of advanced medical technology, pharmaceutical diagnostics, and AI, cloud and software solutions that help clinicians tackle the world's most complex diseases. Serving patients and providers for 130 years, GE HealthCare is delivering bold innovations designed for the next era of medicine across its Advanced Imaging Solutions, Pharmaceutical Diagnostics and Patient Care Solutions segments to help clinicians deliver more personalized, precise patient care. We are a $20.6 billion business with approximately 54,000 colleagues working to create a world where healthcare has no limits.

GE HealthCare is proud to be among 2026 *Fortune* World's Most Admired Companies™.
